Hello,

I am a student at the Illinois Institute of Technology. I am taking a class that involves redesigning a new Metra stop at Ogilvie. If you can answer the following questions for me so that I may get a better understanding of the train stop that would be great.

- What are the track elevations (from the street level) at the Ogilvie Train station?
- What are the platform elevations (from the street level) at the Ogilvie Train station?
- What is the clearance under the CTA tracks?
- How many riders pass through the MetraMart terminal a day?
- How many people use the Ogilvie Station each day?
- Does Metra own all the space underneath the train tracks?
- Is the parking lot below the tracks independent from Metra?

Also:

-Can you send floor plans of the Ogilvie Terminal (from the Citi Corp Building to the CTA Clinton Greenline Stop)?

The information gathered above is intended for academic purposes only and will not be shared with anyone outside of my project class.

Thank you very much, I look forward to your response.

Sincerely,

Alex Buoscio
