RE: 17-FOIA-016 Info - Traffic Control and Barricade

Dear Mr. Stukel:

We are in receipt of your request for information pursuant to the Illinois Freedom of Information Act, 5 ILCS 140/1 *et seq.*

On January 17, 2017, we received your request for information pertaining to an upcoming invitation for bid for a traffic control and barricade contract. You requested information from the past 2 contracts regarding pay item cost increase for this upcoming traffic control and barricade contract. Additionally, you requested any other information that pertains to this contract that could be released to you ("**Request**").

I contacted you on January 18, to inform you that the portion of your Request regarding "any other information that pertains to this contract" was overly broad and our Procurement Department could not provide you with records without further specificity. I then asked if you would clarify the types of documents you were seeking. You responded that same day modifying your Request for the pay item bid tabulations for the current and previous contracts for traffic control and barricade services.

In response to your Request, Metra's Procurement Department is providing you with the current (2013) and previous (2007) contract bid tabulation sheets, as well as the current and previous price lists.

If I can be of further assistance to you, please do not hesitate to contact me.

Sincerely,

Kathleen E. Haton
Freedom of Information Officer
